RISKY PLAY

– Children's own versus adult's perception of risks when playing in natural environments

Free webinar with presentations by Ellen Beate Hansen Sandseter (Norway), Steffen Tangen (Norway), Alexander Olsen (Norway) and Mariana Brussoni (Canada)

April 7th at 4 pm until 5 pm (CET).

Sign up and get the link for the free webinar here: <https://science.nemtilmeld.dk/1145/>

Children & Nature – Denmark (Center for Børn og Natur) invites you to a webinar about the perception of risks when children are playing in natural environments - both seen through the eyes of children themselves and adults around them. We welcome practitioners (e.g. pedagogues or teachers), students and researchers. The webinar will be held in English.

- Welcome, introduction and a few figures from Denmark. Søren Præstholt, Head of Children & Nature – Denmark, University of Copenhagen.
- General perspectives on risky play. Origin of the concept and why risky play is important. Ellen Beate Hansen Sandseter, Professor at Queen Maud University College, Trondheim.
- Children’s own perception of risks. How children (1-2 years) cope with risks in a varied natural environment – and possible implications for the pedagogues. Steffen Tangen and Alexander Olsen (& Ellen Beate Hansen Sandseter), Assistant Professor at Østfold University College, Halden.
- When parent’s perception of risks impedes the active play in natural environment – and what can be done about it. Examples from Northern America. Mariana Brussoni, Director of Human Early Learning Partnership, University of British Columbia, Vancouver.
- Questions and discussions (and hang around)

Children & Nature – Denmark is hosting the webinar. Children & Nature – Denmark is a partnership between four universities and two national NGOs:
